FINANCIAL.

The present situation in finances is one undisturbed and dull tranquillity, but the changes going on in consequence of the silver bill and approaching resumption will cause alterations before long. Until there is enough silver out to make dollars as common as quarters now are, what change they will make cannot very well be foreseen. Of course those changes will not be what was expected rom the laws as proposed in the original Of one feature of resumption, the New York Bulletin remarks: "The full resumption of specie payments will cost the west more than the east, for the reason that the west will have to pay for the transporta-tion of immense amounts of coin. For instance, gold sold in New York, yesterday, at september a premium of \$3 75 on every \$1000. In Chiago it was sold at \$7 50 premium for \$1000. he difference is made up of \$2 express charges, \$0.62 insurance, say \$0.56 interest for three days, at 7 per cent., which leaves only \$0.57 profit per \$1000. The express companies charge twice as much for carrying At \$2 per \$1000 for gold gold and silver they will need to sus-tain resumption will be something of The New York Post states: "It is not unlikely that before the week closes gold will be exported, although dechanged and the bullion value of the new silver | as follows: dollar is 0.9137 gold." At our banks exchange quoted 1/4 discount buying, and 1/4 premium elling on New York; New Orleans buying at If discount, and selling at par. Alternately Shaken and Scorched By the paroxysms of chills and fever, the wretche sufferer for whom quinine has been prescribed e says in vain to exterminate the dreadful diseas with that hurtful pailiative, which at best only mit gates the violence of the fits, and eventually prove highly injurious to the system. In order to effect a thorough cure of malarial fever, whether intermit tent or remittent, or to render the system impregna ble to its attacks, Hostetter's Stomach Bitters should be used daily. That this medicine is a searching eradicant of diseases generated by miasma, and a reliable safeguard against them, is a fact so widely recognized in this and other countries that to adduce evidence in support of it is unnecessary; but were it either essential or desirable to do so, it may well be supposed that from the testimony corroborative of its claims, which has been accumulating during the last twenty-five years and over, sufficient proofs might be gathered to convince the most inveterate skeptic.
